MAKER TABLE

Makerspaces are collaborative learning environments where people come together to learn new skills, exchange ideas and share resources. They are as unique as the school cultures they represent and require flexible and configurable solutions for working, exploring and discovering. The Explorer Maker Table by Haskell has been designed to meet the demanding needs of these creative environments.

MAKE YOUR OWN MAKERS TABLE

The universal frame design allows the Maker Table to be configured with or without storage. The simple open frame option is perfect for spaces where storage is not required at the table and a more open feeling is desired. Our standard butcher block top adds to the durability of this table and with the simple addition of the power module and extension cord, the Maker Table is ready to work in any creative environment.
UNLIMITED STORAGE OPTIONS

The Maker Table frame is designed to accommodate multiple storage options. There are 6 different all metal storage modules that can be specified individually or in combination to create your own unique Maker Table. All of the modules can be accessed from both sides of the table making the configuration process simple and easy. In addition to bin storage and peg board storage, two sizes of open shelving can be specified. Locking door kits can be added to the open shelving for added security.

DURABILITY AND MOBILITY

The Maker Table is constructed with an all metal welded frame for a life time of use, a hallmark of Haskell design and construction. With its integrated bumpers at the base level, durable locking casters and standard butcher block top, the Maker Table is perfect for active learning environments that require flexibility for multiple types of maker experiences. As part of the Explorer suite of solutions, the Maker Table easily supports dedicated and mobile makerspace environments and works seamlessly in any of todays collaborative learning spaces.
